Unnamed

Results-driven communications and marketing professional with over a decade of experience in the space sector, combining a physics background with expertise in digital strategy and science communication. Chartered Marketer (CMktr) with a strong track record delivering campaigns for ESA and Earth observation programmes, specialising in translating complex technical content into clear, engaging narratives. Experienced in SEO, content marketing, data-driven optimisation, and cross-functional project delivery, with additional technical capability in analytics and programming. Founder of a sustainable marketing agency focused on the space economy, with a commitment to responsible space practices and impactful science communication.

Work Experience

Founder & Director at Green Orbit Digital 2023 — present

- Founded and lead a specialist marketing and communications consultancy focused on the space sector, helping organisations communicate complex technologies, missions, and sustainability initiatives to diverse audiences.
- Develop and deliver integrated digital marketing strategies encompassing SEO, content marketing, social media, public relations, email marketing, and lead generation campaigns.
- Advise startups, SMEs, and established organisations on sustainable marketing practices, aligning business growth objectives with environmental responsibility and long-term impact.
- Create technical and thought leadership content covering Earth observation, satellite applications, sustainability, climate services, and emerging space technologies.
- Design and implement data-driven marketing frameworks using analytics platforms to measure performance, optimise campaigns, and improve return on investment.
- Build strategic partnerships across the UK and international space ecosystem, supporting business development, stakeholder engagement, and industry collaboration.
- Represent the company at industry conferences, workshops, and networking events, contributing expertise on sustainable business practices and marketing within the space sector.
- Lead client projects from discovery and strategy through execution and reporting, ensuring measurable outcomes and high-quality delivery.

Marketing & Communications Manager at HE Space for ESA 2021 — 2023

- Managed marketing and communications activities for ESA Business Applications, supporting programmes that enable organisations to leverage space technologies and satellite data for commercial and societal benefit.
- Planned and delivered editorial content, including articles, interviews, case studies, newsletters, and campaign materials aligned with ESA communications objectives.
- Coordinated and hosted webinars, information days, and funding call events, engaging stakeholders from industry, academia, government, and the startup ecosystem.
- Collaborated closely with ESA Corporate Communications, legal teams, programme managers, designers, and external suppliers to ensure consistent messaging and brand compliance.
- Developed communication strategies to increase awareness of funding opportunities, success stories, and programme achievements across European markets.
- Managed digital communication channels and performance reporting, using analytics to optimise audience engagement and campaign effectiveness.
- Supported stakeholder relations and community building across the European space ecosystem, facilitating collaboration between partners, entrepreneurs, and innovators.

Co-Founder & Director at Powering Space 2019 — 2022

- Co-founded an international community platform dedicated to improving public understanding, engagement, and participation in the global space sector.
- Developed strategic partnerships with space organisations, educational institutions, foundations, and industry stakeholders to foster collaboration and knowledge sharing.
- Designed and delivered events, webinars, interviews, and digital content focused on entrepreneurship, policy, sustainability, science communication, and emerging space opportunities.
- Built and managed online communities connecting professionals, students, researchers, communicators, and enthusiasts from around the world.
- Led marketing, communications, branding, and business development activities, helping establish Powering Space as a recognised platform within the international space community.
- Facilitated discussions and networking opportunities that encouraged cross-sector collaboration and supported the growth of future space leaders.
- Promoted inclusive and accessible participation in space activities by creating opportunities for learning, mentoring, and professional development.

Freelance Marketing and Communications Consultant at Self-Employed

2018 —
2021

- Delivered strategic marketing, communications, and content projects for organisations across the space, Earth observation, education, and technology sectors.
- Developed and executed social media campaigns for the University of Leicester Copernicus Hackathon, helping attract participants from diverse academic and professional backgrounds.
- Created editorial content and learning materials for Point.IOT, a European Massive Open Online Course (MOOC) focused on Internet of Things applications and innovation.
- Served as editor for the Copernicus Marine Environment Monitoring Service (CMEMS) Ocean State Report, supporting content development, publication, and stakeholder engagement activities.
- Designed and implemented social media strategies to increase awareness of environmental monitoring services, scientific research, and policy-relevant insights.
- Produced articles, interviews, newsletters, and digital content translating complex technical concepts into accessible and engaging communications.
- Advised clients on digital marketing, audience engagement, content strategy, and communications planning to maximise reach and impact.

Co-Founder & Director at R&R Space Ltd 2018 — 2021

- Co-founded a space sector venture focused on education, outreach, and innovation, designed to inspire and equip the next generation of space entrepreneurs and professionals.
- Developed and delivered programmes combining hands-on learning, workshops, and engagement activities aimed at improving access to space industry knowledge and opportunities.
- Led strategic planning, partnerships, and business development activities to build relationships across academia, industry, and the wider space ecosystem.
- Designed outreach initiatives that translated complex space technologies and concepts into accessible formats for diverse audiences.
- Supported the creation of community-driven events and training activities that encouraged collaboration, creativity, and applied problem-solving within the space sector.

Editor & Communications Lead at Design & Data GmbH 2015 — 2021

- Led editorial development and content production across science communication, space industry storytelling, and technical outreach publications.
- Scripted and conducted interviews with high-profile stakeholders, including diplomats, engineers, and space agency representatives for international science communication series.
- Produced video scripts and co-directed multimedia content for ESA-related engineering and laboratory projects, ensuring clarity and audience engagement.
- Served as Editor-in-Chief for digital platforms, overseeing content strategy, publication workflows, and social media communications.
- Managed cross-platform storytelling initiatives that translated technical and scientific topics into engaging narratives for global audiences.
- Coordinated with designers, engineers, and communication teams to ensure consistency, accuracy, and high production quality across outputs.

STEM Communicator at Bloodhound SSC 2014 — 2015

- Supported STEM outreach activities for the Bloodhound SSC education programme, contributing to national initiatives designed to inspire interest in engineering, physics, and high-speed vehicle technology.
- Developed educational resources for the BLAST outreach platform, translating advanced engineering and scientific concepts into accessible learning materials for students.
- Delivered interactive workshops in schools and public engagement settings, including hands-on demonstrations such as K'Nex car build challenges and applied physics activities.
- Engaged students through immersive STEM experiences, including the "Desert Living" workshop series, linking environmental science and engineering problem-solving.
- Assisted in communicating the technical and scientific goals of the Bloodhound SSC land speed record project to diverse audiences.
- Supported outreach events and presentations aimed at increasing participation in STEM subjects and showcasing real-world applications of physics and engineering.

Science Communication & Outreach Intern at European Southern Observatory (ESO)

2014 —
2014

- Supported the production of science communication materials including press releases, educational resources, exhibition content, and web publications.
- Collaborated with professional science communicators to translate cutting-edge astronomical research into accessible public-facing narratives.
- Assisted in developing multimedia content, including video scripts and visual storytelling materials for outreach campaigns.
- Contributed to the preparation of ESA/Hubble and ESO public engagement outputs, ensuring scientific accuracy and clarity.
- Gained hands-on experience in international science communication workflows within a leading global observatory environment.

Intern (Space Scoop – Science Communication) at Universe Awareness (UNAWA), Leiden University

2013 —
2014

- Contributed to the development and expansion of the Space Scoop science news platform, aimed at making astronomy discoveries accessible to young audiences worldwide.
- Adapted complex scientific research into engaging, age-appropriate content across multiple media formats and distribution channels.
- Researched and evaluated international children's media platforms to improve content syndication and global reach.
- Supported efforts to increase the visibility of science communication content within mainstream educational and youth-focused media outlets.
- Helped refine editorial workflows to improve clarity, consistency, and accessibility of science storytelling for non-specialist audiences.

Intern at Space Generation Advisory Council (SGAC) 2013 — 2013

- Supported the organisation of the Space Generation Fusion Forum and contributed to the coordination of international space policy and youth engagement activities.
- Assisted with the production of the SGAC annual report and internal communications materials.
- Contributed to operational and administrative activities supporting global student and young professional engagement in the space sector.
- Represented SGAC at meetings of the UN Committee on the Peaceful Uses of Outer Space (COPUOS) Scientific and Technical Subcommittee, supporting communication and outreach efforts.
- Engaged with international stakeholders to promote youth participation in space policy and exploration discussions.

Outreach Support & STEM Communicator at South-East Physics Network (SEPnet)

2009 —
2012

- Delivered science outreach presentations and interactive talks to schools, colleges, and public audiences across the UK.
- Supported the development and delivery of physics engagement activities, including demonstrations and interactive exhibits.
- Presented within the “astrodome” inflatable planetarium, introducing astronomy concepts to students in immersive environments.
- Contributed to regional STEM outreach initiatives aimed at increasing participation in physics and related disciplines.
- Helped translate complex scientific ideas into accessible, engaging content for non-specialist audiences.

Postgraduate Demonstrator (Physics Teaching Assistant) at University of Kent

2009 —
2012

- Delivered undergraduate teaching support across physics and mathematics modules, including algebra, computing skills, and foundational physics concepts.
- Marked assignments and provided academic feedback to support student development and understanding of core scientific principles.
- Supported laboratory and tutorial sessions, helping students apply theoretical knowledge to practical problem-solving.
- Contributed to curriculum delivery across first-year and foundation-level physics courses.
- Developed strong communication and instructional skills through direct engagement with diverse student cohorts.

Technician (Space Research Centre, Physics & Astronomy) at University of Leicester

2008 —
2009

- Worked within the Space Research Centre supporting calibration and analysis of satellite instrumentation data, including GERB focal plane systems.
- Developed software tools to manage, process, and visualise scientific datasets for research applications.
- Assisted in the analysis of calibration data to ensure accuracy and reliability of observational outputs.
- Supported scientific research projects involving planetary and atmospheric measurements.
- Gained early experience in scientific programming, data handling, and research workflows in a professional academic environment.

Summer Undergraduate Research Experience (SURE) Participant at 2007 —
University of Leicester, School of Physics & Astronomy 2008

- Participated in the Summer Undergraduate Research Experience (SURE) programme, undertaking a supervised research placement within the Department of Physics and Astronomy and the Space Research Centre.
- Contributed to active research projects spanning astrophysics and space science, working closely with academic supervisors and research groups in a laboratory and data-driven environment.
- Developed and applied programming skills to support scientific analysis, including data processing, visualisation, and computational modelling of research datasets.
- Presented research findings to academic staff and peers at the conclusion of the internship, communicating methodologies, results, and scientific interpretations.
- Gained early exposure to professional research workflows, including experimental design, iterative analysis, and collaborative scientific problem-solving.
- Strengthened technical foundations in physics, numerical methods, and research communication within a world-class academic setting.

Education

Applied Science Communication - Online and Media Writing at 2023 —
University of the West of England 2023

- Gained expertise in communicating scientific concepts to non-academic audiences. Developed the ability to evaluate and adapt writing styles for diverse formats, platforms, and audiences.

CIM Level 4 Certificate in Professional Digital Marketing at 2020 —
Loughborough College 2021

- Building on tactical marketing skills. Modules included Applied Marketing, Planning Campaigns, and Digital Marketing Techniques, developing practical expertise in delivering effective marketing strategies and enhancing professional capability.

Space Studies Programme (SSP) at International Space University 2013 — 2013

- Department: Space Applications
- Team Project: AMBIEnT - Affordable Microsatellite-Based Internet Access and Environmental moniToring

PhD Candidate at University of Kent 2009 — 2012

- During my PhD work, I studied Jupiter-family comets as part of the international SEPPCoN collaboration, aiming to characterise the physical properties of cometary nuclei and compare them with other small body populations. I was responsible for processing and analysing optical imaging data from major observatories, including the VLT, Palomar, and Keck telescopes, and contributed to the interpretation of thermal-IR data from NASA's Spitzer Space Telescope. My work provided critical insights into comet size, shape, spin, albedo, and composition, supporting spacecraft missions such as ESA's Rosetta and NASA's Stardust-NEXT and EPOXI. Through this project, I gained extensive expertise in astronomical image processing, scientific analysis, and collaborative research within a large international team of scientists.

Physics with Astrophysics MPhys (Hons) at University of Leicester

2005 —
2009

- Studied the core of fundamental physics and maths based on Institute of Physics (IOP) 'core of physics' material. Specialised in astrophysics.

Awards

Invited Panellist

UK Space Conference · 2019

Event: UK Space Conference 2019

Award of Excellence

The Communicator Awards · 2017

Project: Lunar Exploration Interactive Documentary

Scholarship Recipient

International Space University · 2013

Programme: Space Studies Programme (SSP)

Award value: €16,500

Grant Recipient

Royal Astronomical Society · 2012

Event: Space Generation Congress · Naples, Italy

Observing Time Award (Co-I)

European Southern Observatory · 2010

Observing Time Award (Co-I)

Palomar Observatory · 2010

UK Student Representative

Royal Astronomical Society · 2009

Event: International Year of Astronomy Opening Ceremony · UNESCO, Paris

Nominee

British Interplanetary Society · 2010

SURE Fellowship

University of Leicester · 2007

Academic & Service Awards

Skegness Grammar School · 2005

Volunteering

Student organiser, UK Space Conference 2009, 2010 at BROHP 2018 — present

Helped STEM students and recent graduates with career guidance, technical skill development, networking, personal branding and employability.

Volunteer at Woodland Trust 2018 — present

Helped STEM students and recent graduates with career guidance, technical skill development, networking, personal branding and employability.

Vice-Chair at UKSEDS 2013 — 2015

Helped STEM students and recent graduates with career guidance, technical skill development, networking, personal branding and employability.

Team Lead, UKSEDS Asteroid Chasers, Pan-STARRS Asteroid Search at UKSEDS 2012 — 2012

Helped STEM students and recent graduates with career guidance, technical skill development, networking, personal branding and employability.

Trustee at UKSEDS 2012 — 2012

Helped STEM students and recent graduates with career guidance, technical skill development, networking, personal branding and employability.

Corresponding member, Events Committee at British Interplanetary Society 2012 — present

Helped STEM students and recent graduates with career guidance, technical skill development, networking, personal branding and employability.

- Corresponding member, Education & Outreach Action Group at British Interplanetary Society** 2012 — present
- Helped STEM students and recent graduates with career guidance, technical skill development, networking, personal branding and employability.
- Secretary at UKSEDS** 2012 — 2013
- Helped STEM students and recent graduates with career guidance, technical skill development, networking, personal branding and employability.
- Communications support role, , 2012-2015. at Campaign for Dark Skies (CfDS)** 2012 — present
- Helped STEM students and recent graduates with career guidance, technical skill development, networking, personal branding and employability.
- Find An Asteroid Search Campaign at Space Generation Advisory Council** 2012 — present
- Helped STEM students and recent graduates with career guidance, technical skill development, networking, personal branding and employability.
- UK National Point of Contact at Space Generation Advisory Council** 2012 — present
- Helped STEM students and recent graduates with career guidance, technical skill development, networking, personal branding and employability.
- Comms Officer at PLUME (Picosatellite of Leicester University Micrometeoroid Experiment)** 2006 — present
- Helped STEM students and recent graduates with career guidance, technical skill development, networking, personal branding and employability.
